## **DETAILED ACTION**

### ***Respond to Preliminary Amendment***

1. This office action is in response to the preliminary amendment file on 1/16/04.
  - Claims 2-19 have been cancelled.
  - Claim 1 is pending in the application.

### ***Specification***

2. The disclosure is objected to because of the following informalities:
  - On page 2 of the preliminary amendment "a divisional application" should be change to -- continuation application -- in order to be consistent with the utility patent application transmittal letter;
  - The US patent number and date of issued of the cross-reference related application should be fill. Appropriate correction is required.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,717,853. This is a double patenting rejection.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Kurihara et al. (6,525,969) disclose a decoder apparatus and methods for pre-charging bit line of a flash memory device.
